

Renheart Israel Maquiling
Warehouse Worker/Assembly Line Worker
Gwangju, Gwangsan-gu, Gwangyeoksi, Pyeongdongsandan 1beonru 140
Renheart_maquiling@yahoo.com

Summary

Efficient warehouse team member accustomed to fast-paced, physically-demanding work. Lift up to 50 pounds without assistance and smoothly use machinery such as Forklift and Cranes for heavier loads. Skilled at loading and unloading items from trucks, staging shipments, and storing products.

Dependable water pump assembler with high-level skills in assembly, inspection, and testing of water pumps products. Monitors output to verify conformance to specifications and quality standards. Accurately documents daily production data to assist supervisors in production scheduling and performance evaluation.

Skills

- Forklift Operation
- Inventory Reporting
- Assembly Preparation
- Product Management
- Equipment Operation
- Material Handling

Experience

Warehouse Worker
December 2016-February 2018
Grundfos Pumps South Korea

Duties:

- Avoided safety hazards by correctly operating machines such as forklifts and cranes.
- Supported inventory accuracy by properly recording materials movement.
- Processed incoming trucks efficiently, working to unload, stage, and store materials smoothly.
- Assisted with safe housekeeping procedures by maintaining clean work stations and areas.
- Supported team efforts by backing up fellow warehouse workers in managing incoming and outgoing products.
- Kept computer inventory tracking accurate by updating with new materials and other changes.
- Minimized errors by inspecting incoming orders, checking contents and quality, and verifying paperwork.
- Maximized distribution and replenishment efficiency by keeping storage areas clean and organized.

Production Line Assembler
March 2018-Present
Grundfos Pumps South Korea

Duties:

- Monitored compliance from assembling to packaging.
- Installed components to complete assembled water pumps products.
- Verified conformance to specifications by inspecting. Testing, and calibrating pump products.
- Evaluated output quality to identify discard or re-manufacture defective products.
- Documented daily production data and submitted reports to support manufacturing performance analysis.
- Achieved production goals effectively interpreting process documents, diagrams, and written instructions to complete tasks.
- Maintained production equipment and machinery.
- Promoted safety and productivity by keeping work areas clean and organized.
- Performed quality checks on parts and products.
- Boosted team efficiency by learning all roles and rotating through positions.
- Moved heavy loads with equipment such as forklifts and overhead cranes.
- Shipped completed work quickly, smoothly packaging items coming off production line.
