Main duties and Responsibilities:

Duties and Responsibilities

Emergency nurses specialize in assessing, intervening and stabilizing a variety of trauma and illnesses with decisive action. Due to the range of medical conditions that may require urgent treatment and care, they must be knowledgeable about general as well as specific health issues.

The most important responsibility for an emergency nurse is understanding triage, which is a method of prioritizing injuries based on medical need. An emergency nurse must have the ability to make quick and accurate assessments about incoming patients, including both physical and mental health conditions.

- Identify the medical problem
- Document medical history
- Check for any allergies and current medications
- Obtain height, weight, body temperature, heart rate, blood pressure and oxygen saturation

Types of patient nursed:

- Cardiac Patients
- Nephro patients
- Neuro Patients
- Pulmo Patients
- General Pediatric Patients
- Pre-Op Patients

- Trauma Patients
- VA Patients
- OB Patients

- Pre and Post Cardiac Arrest Patients
