Objective

I seek challenging opportunities where I can fully use my skills for the success of the organization.

Experience

- **Toyota Motor Philippines Corporation** May10 2010 - Up to present
Welding Maintenance
11 years

Education

- **San francisco institute of science and technology** 2005-2007
Automotive technology
Vocational

Skills

- *Spotgun specialist in metal works *Mig welding machine preventive maintenance *Mig welding operational works *Oxy- acetelyne cutting *Brazing of damage copper item *Hoist trouble shooting *Hoist operation work *Hard wiring installation *Robot teaching during roller hemming *Robot program endurance test *Know how to forklift (but no certificates only experience to drive)

Projects

- **Modification of cable**
We used aid cable laterally to stationary spot welding machine,
-Problem - aid cable has no back up during linestop
Countermeasure-
_using of damage kickless cable
To have long lifespan of cable..
Beneficiary-company can save cable annually
- **Overflow water controller**
I encountered cooling tower to closed the valve of refilling hose, the result is water over flow,
Contermeasure- installation of float switch to avoid overflow of water..
- **Try team project of new model car**
Im also selected to be part of new model installation of spotgun, hoist, transformer and wokability of spotgun..
