**Sex:** Male  
**Religion:** Roman Catholic  
**Citizenship:** Filipino  
**Language Spoken:** English, Tagalog, Visayan

#### **2. EDUCATIONAL BACKGROUND**

June 2012 - 2016                      - **BS in Electro-Mechanical Technology**  
University of Science and Technology of Southern Philippines

#### **3. WORK EXPERIENCE**

<u>Year</u>	<u>Name of Company</u>	<u>Position</u>
July 13, 2016 – Present	<b>Del Monte Philippines Incorporated</b> Bugo, Cagayan de Oro City	<b>Power Plant Operator</b>

##### **A. POWER PLANT TENDER**

- Major function:
- Duties/Responsibilities

##### **Operates cook room recirculating cooling tower**

1. Starts, operates and shuts off cooling water System pumps and auxiliary equipment.
2. Does water treatment chemicals as required and perform chemical residual tests.
3. Performs and records test on PH, TDS, bacteria smear, and alkalinity conductance.

##### **B. BOILER OPERATOR**

- Major Function:
- Duties/Responsibilities

##### **Operates steam boilers**

1. Starts, operate and shut-off boiler properly
2. Performs corrections, remedies and adjustments on minor operational problems
3. Perform functionality testing of boiler low water level alarms and fuel cut-out.

### **C. MECHANICAL FITTER**

- Major Function:
- Duties/Responsibilities

#### **Fitting and assembling mechanical parts**

1. Fabricates, installs and repairs heavy machinery
2. Measuring and marking out materials for fabrication.
3. Keeping records of operations, safety and maintenance procedures.
4. Cutting, grinding and shaping metal and other materials.
5. Interpreting diagrams, drawings, specifications and plans to determine suitable material and sequence of operations.
6. Operating specialized tools and machinery.
7. Assembling fabricated parts to produce tools and machines.
8. Following safety protocols.
9. Diagnosing and repairing faults with tools and machinery, and performing regular maintenance.
10. Setting up tools and machinery for fabrication process, including guides, stops and other controls.
11. Monitoring fabrication process and adjusting settings when necessary.

### **D. AUXILIARY EQUIPMENT OPERATOR**

- Major Function:
- Duties/Responsibilities

#### **Operates boiler auxiliary equipment**

1. Starts, operates and shuts-off boiler properly
2. Feeds water pump, fuel pump, booster pump, chlorinators, softeners, dealkalizers, air compressors, chemical dosing pumps, fuel and feed water heaters.
3. Perform boiler water analysis, chemical residual test, chlorine residual test and water softness test.

### **E. PRODUCTION ANALYST**

- Major Function:
- Duties/Responsibilities

#### **Set-up work schedules and time keeping**

1. Prepares daily time records among the personnel in the department
2. Gathers data records and prepare reports on energy consumption
3. Prepares requisition, monitor and control office employees and miscellaneous supplies.

## **4. SKILLS**

- Skilled in power plant, substation, and utility voltages
- Responsible for maintaining the gas turbines and boilers to maintain the necessary steam to power the various site facilities
- Complete shift inspections of the following: gas turbines, boilers, rectifiers, air compressor, deep wells, reverse osmosis units, and electrical generator.
- Basic computer skills
- Exercise discretion and good sound judgment
