Team player  
Communication  
Inter personal skills.

### Strengths:

Self Learner  
Adaptable  
Decision-making

## EXPERIENCE

### IVY | SPORTS BETTING APPLICATION

Full Stack Developer | Feb 2021 - Present

- **Project Aim:** Enhance the current betting application with the latest features.
- **Responsibility:**
  - Create angular-based components, services, and models supporting multiple themes.
  - Update all the dependent microservices and publish nugets using different tools for build and release. Along with unit test cases for the frontend and service layer.
- **Challenges I Faced:**
  - Analyze the Moscow and prepare tech approach for the implementation

### ACS SOLUTIONS | HR VIDEO TRAINING SOLUTION

Full Stack Developer | May 2018 - Feb 2021

- **Project Aim:** This client owns a product of video training course delivering to their clients on a license based. Earlier Application was developed in Asp.net. In this project, we have migrated to Angular 8, C# Frame work.
- **Responsibility:**
  - Based on Mockups, we have designed UI Functionality and Back End Controllers. And currently, we are maintaining the production support.
  - Along with regular development, I also worked with Page Speed optimization,
  - Developing complex and dynamic pages in E comm Site and LMS portal.
- **Challenges I Faced:**
  - Implemented SSO for Admin app and User app in Dot net Core,
  - Robust Course streaming page development.
  - Chart beat Integration, Jenkins,
  - Handled various production issues and enhanced the existing features like license managemet, custom policy ,mangement
