## WORK EXPERIENCE

### COMPANY

**Cagayan Corn Product Corporation**  
**SAN RAFAEL, BULACAN**

**Position:** Welder

**Inclusive date:** FEB 2019 up to present

### Duties and Responsibilities

#### **.Fabricate a cube for the Boiler**

Prepare the plate first then measure the width and length of the plate and cut using a grinder after I assemble it.

#### **.Fabricate cylinder cone.**

Prepare the plate so I can form a cone I measured the length, then to make a circle, I used a compass to get the size of a circle then after that

I rounded it using a bending machine and then assemble it to form a cone.

#### **.Plange**

prepare a plate to make a circle using the compass, I measured lengths when I got the circle size, then cut it using oxyacetylene, Use a drill to make a hole for the screw

#### **.Extension downspout square tubes**

prepare a stainless plate get the length and width after measuring, cut using a grinder, and then assemble using a tig weld machine

#### **.Install steam pipe**

I prepare the tube then also prepared the elbow pipe and install the steam boiler using a welding machine.

#### **.Cut walk Bridge for the Silo**

I prepare tubular, square tube, angle bar, and steel matting then assemble as a bridge
