### PROFESSIONAL SUMMARY

Experienced pharmacist in preparing and dispensing medication. Thorough knowledge of computerized drug-distribution systems, drug-appropriateness review, unit-dose dispensing systems, skin testing, extemporaneous compounding, electrolytes preparation, chemotherapeutic assessment and preparation

### EXPERIENCES

Makati Medical Center (Jul 2018– Present)

#### ***In-patient Pharmacist***

Conducts drug-appropriateness review and validates prescriptions received for all medication orders prior to dispensing.

Communicates any identified medication-related concerns to prescribing physician and/or nurses by providing pharmacy intervention and resolution.

Checks accuracy of medicines prepared by the pharmacy assistants.

Ensures dispensing in a timely manner.

Checks dose and amount of drugs in unit dose before dispensing.

Provides counseling to Health Service Program (HSP) patients about drug therapy.

Provides drug information using up-to-date references during telephone inquiries.

#### ***Compounding Pharmacist***

Prepares customized dosage forms and/or prescription medications to meet an individual patient's or physician's needs.

Identifies physical and chemical compatibilities of medications and can prepare extemporaneous dosage forms.

Dispenses medications by compounding, packaging, and labeling pharmaceuticals.

#### ***Antimicrobial Stewardship Pharmacist***

Prepares skin test orders and concentrated electrolyte orders.

Performs activities of the Antimicrobial Stewardship Program by monitoring the days of treatment of antibiotic usage of patients.

Assists doctors and nurses in performing Cardiopulmonary Resuscitation.

#### ***Operating Room Pharmacist***

Prepares anesthesia kit for various surgical procedures.

Provides nurses, surgeons, and anesthesiologists drug information needed during operating procedures.

Ensures safety of floor stock medications (refrigerated and dangerous drugs)

#### ***Sr. In-patient Pharmacist***

Prepares IV admixture preparation

Assigns in Cancer Center in the hospital

Checks dose and prepares Chemotherapeutic drug

Helps in any hard drug information including those with computation
