Professional Experience

Talaghay Software Studios

2023–Present

- Android Developer at Talaghay Software Studios
- **AKO OFW** Application. As the Android developer, I created a user-friendly app empowering mistreated Overseas Filipino Workers (OFWs) to report incidents and take action. Available on the Google Play Store, it serves as a valuable resource for OFWs facing unfavorable working conditions.
- **Bizpad** Mobile App. Involved in creating an efficient mobile app for grocery stores, enabling easy monitoring of sales, inventory, popular items, and revenue, simplifying tasks for store owners.
- **GFS** App (Arduino to Flutter Application) Contributed to developing a gas fire smoke detector system using Arduino technology, integrated with a Flutter app for real-time monitoring and alerts. Enhanced functionality and usability as one of the Flutter app developers.
- **Raven Sanz** is a mobile book application similar to WattPad, but it is more user friendly and has its own unique features.

HOTTLabs Solutions Inc | Junior Android Developer

2022 – 2023

- Student Intern at HOTTLabs Solutions Inc.
- Learned How to use GitHub, Git WorkFlow, and GitHub Repositories
- Used Figma for Mobile Application's UI/UX and Prototyping.
- Trello Board Task Management.
- Developed an Android Application (FitneXt App) Using Kotlin Language Full Stack an Application used by Gym-goers to guide them in a specific workout for their desired target muscles.

Naval Information Communication Technology

Center PN | On the Job Training

January 29 – March 22, 2018

- Windows Installation
- Cyber Security Awareness
- Developed a Document Tracking System
- Ethical Hacking
