Painter Foreman Job Duties:

- Ensuring that safety procedures are followed, such as wearing safety equipment while working with chemicals or machinery.
- Making sure that proper materials are used to complete the job, such as brushes, rollers, or drop cloths.
- Maintaining a schedule for production, recording progress, and ensuring that deadlines are met.
- Inspecting finished work sites for painting projects, including removing old paint, repairing surfaces, and patching holes.
- Assembling scaffolding as required.
- Covering trim, floors, furniture, and other surfaces with masking tape, drop cloths, and other protective coverings to keep them free of paint.
- Coordinating with the client, architect, designer, or engineer regarding design details, and specifications.
- Monitoring the performance of workers to ensure that job requirements are being met.
- Communicating with clients to determine their painting requirements and helping them make the best decisions for their projects.
- Setting up ventilators and other safety equipment to protect painters from unhealthy fumes.
- Applying primer and another sealer to paint surfaces to ensure that paint sticks to them.
- Applying paint, stain, and other finishes to paint surfaces using paintbrushes, rollers, or sprayers.
- Maintaining an inventory of supplies like paint brushes, rollers, and tarps.
- Removing old finishes using scrapers, chemical compounds, or blowtorches.
- Estimating time and material costs on painting projects.
- Reviewing and implementing work orders and assignments.
- Removing and reinstalling fixtures.
- Following safeguards, rules, and regulations.
