Playing Basketball
Playing Piano
Singing
Dancing
Music Driving

ABOUT ME

I come from a varied background and have had interesting job experiences. In the construction business, I began my professional career as a field engineer, where I was able to apply my technical skills to large-scale projects and ensure their effective completion. In addition, I obtained important knowledge about the complexities of power distribution and generation while working as a senior engineer at the National Power Corporation, which oversees diesel power plants. And at present, my job as a substation engineer is to make sure that communities get electricity in a dependable and effective manner.

EXPERIENCE

ALBAY ELECTRIC COOPERATIVE AUGUST 2023 – PRESENT
Substation Engineer/ Internal Technical Auditor
