

ARNOLD MANDANAS

CNC MACHINE OPERATOR

Address Mahayahay Lemery Batangas, Philippines

4209

Phone +886 901124582

E-mail ricaarnoldmandanas@yahoo.com

Skilled CNC Machine Operator adept at setting up, maintaining and operating machining equipment, with expertise in machine troubleshooting and product inspection. Well-organized and highly productive with superior teamwork and communication skills. Versed in reading and interpreting blueprints and schematics.

Excellent knowledge in operating grinders, lathes and various CNC machines in fast-paced production and maintenance environments. Dependable and reliable with expertise in monitoring telemetry, changing out tooling and loading materials.

Knowledgeable about inputting commands, setting tolerances and maintaining equipment. Dedicated to craft and always looking for opportunities to produce better components and reduce breakdowns or other problems impacting production results. Skilled in tooling changeover, equipment set up and sequence planning.

Skills

- Adaptability
- Attention to detail
- Strong work ethic
- Time management
- Safety Compliance
- Defect Identification
- Quality Assurance
- Malfunction troubleshooting
- Blueprints interpretation
- Safety processes and procedures
- Work Order Interpretation
- Multitasking Abilities
- CNC Machine Operation

Work History

2014-11 - Current

CNC MACHINE OPERATOR

TSUNG WEI TECH. CO. LTD., Taoyuan, Taipei, Taiwan

- Exceeded productivity targets consistently, skillfully managing time and workload to achieve outstanding results.
- Inspected machined products to determine compliance with specifications and documented results
- Streamlined workflow with effective management of multiple CNC machines simultaneously.
- Reduced material waste through precise programming of CNC machines for accurate cutting and milling operations.

- Studied and interpreted drawings, specifications, manuals and sample parts to set dimensions and tolerances
- Improved workplace safety, conducting regular inspections and promptly addressing any hazards or mechanical issues.
- Manually set up machinery, lathes, and grinders.
- Input instructions to program CNC machines to control machine movement and produce parts to specification.
- Kept accurate operating records by documenting machine usage, production numbers and any issues that arose.
- Assessed equipment after each production run and performed preventive maintenance to keep machines running smoothly.
- Developed custom toolpaths for complex parts, significantly reducing production time while maintaining precision requirements.
- Leveraged expert knowledge of materials properties to select appropriate cutting tools and speeds for maximum efficiency during machining operations.

Education

2008-10

College: TERTIARY

University of Batangas - Batangas City

2003-04

High School: SECONDARY

Gov. Feliciano Leviste Memorial National High School
