📍 Winnipeg, MB

With two years of experience as a Medical Technologist at St. Joseph Hospital, I have a thorough understanding of clinical laboratory procedures and operations. My time at St. Joseph Hospital has improved my ability to execute diagnostic tests properly and efficiently while maintaining high quality and safety requirements. I am committed to using my knowledge to provide exceptional patient care and support the healthcare team's objectives.

Experience

● St. Joseph Hospital of Remedios, Inc.

May 2021 - August 2023

Medical Technologist

- Implementing and upholding stringent quality control procedures to guarantee the accuracy and dependability of results.
- Following safety measures and recommendations to safeguard oneself and colleagues from potential hazards linked with laboratory work.
- Applying critical thinking abilities to troubleshoot problems, interpret odd outcomes, and make educated judgments about more testing or actions.
- Schedule management entails effectively managing workload and completing examinations and reports on schedule.
- Paying close attention to detail in order to avoid errors in sample handling and testing procedures, which is critical for patient safety.
- Using critical thinking abilities to solve issues, evaluate anomalous outcomes, and make educated decisions about more testing or actions.
- Communicating effectively with healthcare professionals, patients, and coworkers in order to convey test results and collaborate on patient care.
