Duties and Responsibilities

I coordinate and liaise with stakeholders on all project's related budget, managerial & design decisions during the project's lifecycle. I hold the responsibility to liaise and coordinate with the Managing Director and the rest of the senior management team/peers with all matters related to multi-disciplinary design operational issues required for the success of the project in accordance with the Owner's expectations. I hold the responsibility of setting, implementing, monitoring, and reporting of all required management reports for the department in accordance with the program's procedures. Review and coordination of design submittals from contractors, as well as following up site supervision, design conflicts and variation orders for the Owner.

Review technical submissions and design layouts as well as material submittals from contractors.
