CERTIFICATION AND TRAINING

- Informatica Power Center Data Integration 10: Developer, Specialist Certification
- Agile Scrum Training (APEX Global)

KEY SKILLS AND TECHNOLOGIES

Technical Skills

- ETL design and implementation and performance tuning.
- SQL implementation and performance tuning.
- REST API implementation.

Functional Skills

- Retail Core Banking System
- Financial Services – Insurance
- Agile Methodology
- Business Analysis
- IFRS-4
- Requirement Analysis
- Data Integration and Data Tuning
- Jira and Confluence Management
- Silva ticketing tool
- Wrike
- Airtable

Technologies

- Talend Cloud Studio
- Informatica Power Center (v 9.x and 10.x)
- IBM DBMoto Management Center
- Tableau
- Oracle – PL/SQL
- MySQL
- Hadoop
- GIT
- Salesforce
- Adobe Marketo
- Postman

CLIENT ENGAGEMENTS

RingCentral (Acquire Asia Pacific)

Associate Manager, Marketing Integrations | April 2022 – present

Integrations Engineer, Marketing Integrations | March 2021 – March 2022

- Driving data architecture designs to help optimize lead and data flow across multiple systems.
- Implements integrations and automations for marketing and global operations.
- Provides technical support for any data related inquiries within Salesforce, Marketo and Hadoop.
- Drives continuous process improvement and standard development
- Monitor existing data workflows that ensures both the availability and prompt response to any stakeholder concerns.

Sunlife Asia Service Center (Vertere Global Solutions)

Analyst Programmer S2 | September 2019 – February 2021

- Implements sprint planned ETL objects and oracle enhancements.
- Performs the non-production (SIT/UAT) and production support.
- Conducts requirement assessment and implements performance tuning for ETLs.
- Facilitated the Informatica upgrade and oracle upgrade.

Accenture Technology Center of the Philippines
Associate Software Engineer | September 2018 – August 2019

Global Insurance Company in Hong Kong

- **COPERNIC Implementation (IFRS4)**

- Performing data analysis for the implementation and optimization of Informatica mappings and workflows, data flows, shell scripts and stored procedure base on business requirements.
- Developing complex Informatica ETL processes that integrate large data sets from multiple sources.
- Loading data objects including dimensions, reference tables and aggregates.
- Communicates and engaged in client interaction, technical discussion during project planning, requirements analysis, impact analysis and demo on completed sprints.
- Worked on DBMoto Replications for data loading/replication from AS400 source to oracle database.

October 2018 – November 2018

Global Insurance Company in Hong Kong

- **E-Life Project**

- Developed and delivered 64 DBMoto components for data replication from AS400 source to oracle database and deployed in multiple environment – SIT/UAT

June 2018 – September 2018)

Global Insurance Company in Hong Kong

- **Mobile Application**

- Delivered technical implementation of Informatica Power Center as ETL and PL/SQL Stored Procedure for five source system in both Hong Kong and Macau entity.
- Performed optimization for multiple Informatica and stored procedures based on business requirement and industry standards (pushdown enablement, database hints creation, index creation, code optimization) that pulls data from either Oracle tables or flat files with different file extensions & encryptions.
- Performed production releases and coordinated with other teams namely Release Management Team, Database Administrators, and Product Owner during pre-production release preparation.
- Conducts unit testing and peer review for the technology created.
- Ensured the integrity and accuracy of data through rigid analysis, coding, and creation of technical documents and operational manuals.

May 2018 – June 2018

Block Chain Initiative

- Developed a functional website of Block Chain methodology for a basic bank application using HTML and CSS technologies and drafted smart contracts using java scripts.

July 2017 – June 2018

Global Bank in Germany

- Responsible for the creation of Informatica mappings, sessions and workflows committed to meet client's requirement and standards.
- Performed defect fixing based on the client's SLA.
- Created Module Test Plan for each component for unit, component, system, and regression testing.
- Developed Informatica mapping with 15 source tables with total of roughly 500 fields with transformation rules each field and error validation and logging

EDUCATION

- TECHNOLOGICAL INSTITUTE OF THE PHILIPPINES – MANILA (2013-2017)
Bachelor of Science in Electronics Engineering
- TECHNOLOGICAL UNIVERSITY OF THE PHILIPPINES – MANILA (2009-2012)
Bachelor of Technology in Electronics Engineering
