RYAN DAVE D. SANCHEZ

Project / Program Manager

With a strong foundation in project management, he brings a wealth of competencies to the table. His proven ability to lead cross-functional teams, manage resources, and meticulously plan and execute projects is underscored by his extensive experience in the water industry. He prides himself on his effective and efficient communication skills, which he has honed to foster positive stakeholder relationships and resolve conflicts efficiently. His passion for problem-solving, combined with a data-driven decision-making approach, ensures that he delivers quality results while adapting to changing circumstances. He is committed to continuous improvement and has a track record of implementing best practices.

Work Experience :

Project / Program Manager (February 2022 to Present)

Manila Water Total Solutions Corp.

- Headed, managed and implemented various design and build projects with project costs ranging from 2M Php to 287M Php
- Develops programs to support the organization's strategic direction, as well as creating and managing long term goals.
- Managed new business development projects providing CAPEX and OPEX plans in coordination with the Water Districts in the City of Pampanga, City Baguio and City of Pangasinan.

Technical Head (October 2019 to August 2021)

Primewater Munoz, Nueva Ecija

- Manages overall OPEX and CAPEX activities (new service connections, service level improvement, resolution of water quality and availability issues, valving activities, mainline and secondary leak repairs, massive metering projects, closing of illegal connections, proposes and supervises projects for supply and pressure improvement, billed volume increase and NRW reduction from start to finish) and overall supply and pressure management, billed volume generation and non-revenue water of Muñoz, Nueva Ecija.

Engineer (September 2018 to September 2019)

Munoz Water District

- Handles OPEX and CAPEX activities (new service connections, mainline and secondary leak repairs, service level improvement, resolution of water quality and availability issues and valving activities)

OIC Assistant Manager NRW Management (January 2009 to September 2018)

Maynilad Water Services, Inc.

- Manages Sampaloc NRW's supply and pressure management, billed volume and non-revenue water, and overall Sampaloc Technical Management's operations and OPEX / CAPEX Activities
- Coordinates with various Maynilad Departments and Local Government Units for upcoming and on-going RUC / DUC projects including permit acquisition for construction works.
- Strategizes plans and programs to establish and diagnose District Metered Areas (DMA).
- Supervises activities of contractors and handles contractors' billing performance evaluation.
- Responds to customer inquiries and grievances.
