EXPERIENCE

Wideout Inc. McKinley Hill Taguig, Philippines — *Flash Dev/ Web tester*

May 2010 - 2012

Analyze specifications before initiating any web testing. Develop tests and create test cases. Execute manual and functionality testing, then document bugs and generate a report. Troubleshoot issues that arise and re-test the software accordingly.

Safeway Philtecth. McKinley Hill Taguig, Philippines— *POS (Point of sales software) tester*

Oct 2012 - 2014

In the process of testing the fuel pump system, we develop specific test cases. These are executed using the POS machine via a web application interface. Any encountered bugs are meticulously documented and reported to ALM and HPQC. Troubleshooting is conducted to address issues promptly, followed by re-testing to ensure successful resolution and proper system functionality.

Cheq Systems Inc. Sedeno Street Makati City Philippines— *Software Quality Engineer*

Aug 2014 - May 2021

To craft a robust test plan for the project, we start by creating comprehensive test cases. Then, we execute manual and functionality testing to validate system performance. Any encountered bugs are documented, and reports are submitted to ALM and HPQC. Troubleshooting procedures are promptly implemented for issue resolution. We also conduct compatibility testing for deployment across different clients. Finally, re-testing is performed to confirm fixes and ensure system reliability.

Dayforce / Talent2 HRBPO Inc. Libis Quezon City Philippines— *Test Analyst*

May 2021- Up to Present

In the testing phase, we first focus on creating test cases to outline various scenarios. These cases serve as a blueprint for our testing efforts. Subsequently, we execute both manual and functionality tests to assess the system's performance and ensure it meets requirements. Any bugs discovered during testing are diligently documented using Xray and Jira, enabling efficient tracking and resolution. Additionally, we leverage automation tools like MABL to automate repetitive testing tasks, enhancing overall testing efficiency and accuracy.

SKILLS

SQL (deployed on SMART 4 yrs)

DATA Migration (deployed on SMART 4 yrs)

SAP (Deployed on Zuellig Pharma 1 yr)

ERP System (Deployed on Zuellig Pharma 1 yr)

API testing/ POSTMAN (Deployed on UnionBank)

MABL Automation (1 yr)

Article 36 testing (Japan tax rule)

EDUCATION

Tertiary: SY: 2006 – 2010

Eulogio Amang Rodriguez Institute of Science and Technology

College Degree in Computer Science/Information Technology

Secondary SY :2002 – 2006

Bulihan national Highschool

LANGUAGES

English, Filipino
