

Jennifer Calumba Reponte

Address: Candau-ay Habitat, Dumaguete City, Negros Oriental 6200

Mobile Phone No: 09634688839/09362239227

Email Address: jenreponte1979@gmail.com

OBJECTIVE:

To explore greater opportunities in mineral exploration and mine geology and willing to be trained in other related fields for self-reliance and professional growth to be utilized to the fullest in the fulfillment of the company's goal.

EDUCATION:

Negros Oriental State University (formerly Central Visayas Polytechnic College)

BS Geology 2002

WORK EXPERIENCE:

BenguetCorp Resources Management Corporation (subsidiary of Benguet Corporation) - Nickel Mining Project

Field Office: MJM Building, Lipay, Sta Cruz, Philippines

Main Office: Universal Re Building 106 Paseo de Roxas 1226 Makati City, Philippines

SENIOR GEOLOGIST – November 2020 to Present

Duties and Responsibilities:

- Department Manager of the Mine and Exploration Department of the company
- Responsible for all exploration and other field related activities such as conduct geologic mapping / sampling, monitoring of diamond drilling operations, test pit profiling and sampling, drill core geological logging, sampling and core-shed operations.
- Responsible for the supervision of local laborers in all aspects of exploration activities.
- Supervised surface mapping and sampling within the existing mine areas and adjacent and satellite resources in and around the company's tenement.
- Responsible in planning and implementation of drilling program
- Responsible for the preparation of work programs and budget for the Geology Department and participate in carrying out its plans and objectives.
- Site Lead Auditor for ISO Environmental Management Organization, i.e. assist in planning, managing, and directing the internal audit team tasks and activities, and in making reports on audit results to the ISO Lead
- Responsible for supervising the actual drilling operations and ensuring with utmost care and safety of all drill staff, and the overall upkeep and cleanliness around the drilling areas.
- Coordinate with the drilling supervisor and drilling group with regards to the necessary drilling data and information.
- Monitor and supervise the face sampling activity, face mapping, geological mapping and nickel assay results analysis.
- Performed other tasks assigned by the Resident Manager and Corporate Senior Geologist.

Sophi Inc

Address: Dumaguete IT Park, Calindagan, Dumaguete City, Negros Oriental

TRAVEL RESERVATIONS AGENT – May 2017 to Oct 2020

Duties and Responsibilities:

- Hotel Bookings: Case Handler
- Contact hotels and providers like Booking.com, Agoda, Priceline, etc. regarding hotel payments, denied checkins, relocation, double charges, rebooking
- Responsible for hotel bookings verifications via Booking.com
- Responsible for the payment of hotel bookings through a virtual credit card

BenguetCorp Nickel Mines Inc (subsidiary of Benguet Corporation) - Nickel Mining Project

Field Office: MJM Building, Lipay, Sta Cruz, Philippines

Main Office: Universal Re Building 106 Paseo de Roxas 1226 Makati City, Philippines

Project Geologist – May 2015 to August 2016

Duties and Responsibilities:

- Responsible for supervising the actual drilling operations and ensuring with utmost care and safety of all drill staff, and the overall upkeep and cleanliness around the drilling areas. Coordinate with the drilling supervisor and drilling group with regards to the necessary drilling data and information.
- Supervision of the day to day drilling operations/activities in assigned project area.
- Check and observe the proper implementation of the standard drilling operating procedures and the conditions of the drilling equipment/s.
- Responsible for the regular monitoring of all operational drill rig machines.
- Monitor and evaluate the progress of drilling activities against programmed accomplishment relative to the objective and schedule.
- Relocate drill holes where drilling is difficult with depths less than 1 meter or location near gully, creek and steep slope.
- Collect and organize drilling data that will be used for the report.
- Assist in the analysis and interpretation of geologic data/information gathered from drilling operation and assay results.
- Assist in the preparation of Budget for the Proposed Exploration Drilling Project.
- Supervise the daily face sampling activities on active mine bench inside the mine open pit areas.
- Assist the Senior Geologist/Geology Division Manager in the preparation and timely submission of Quarterly and Year-End Reports for MGB and other reportorial compliances.
- Responsible for the writing of the geological report.
- Performs other tasks that may be assigned by the Superior.

Wolfland Resources Inc. - Exploration of epithermal vein-type gold deposit and porphyry

Copper-gold mineralization

Field Office: Brgy Mainit, Manticao, Misamis Oriental

Project Geologist – Oct 2013 to March 2014

Duties and Responsibilities:

- Responsible for the collection and compilation of geological data through field mapping, and sampling and research. Coordinate with the Mine Operation and Mine Engineering Department Group with regards to necessary geological data and information.

- Assist the Senior Geologist to implement the various geological activities within the company's mining tenements and other exploration projects or mineral prospects.
- Assist in the analysis and interpretation of geologic data/information gathered from drilling operation and assay results.
- Monitor and evaluate the progress of drilling activities against programmed accomplishment relative to the objective and schedule.
- Supervise the post drilling activities such as photography, logging and sampling of cores.
- Assist in the correlation and projection of geologic observations necessary in the interpretation/reinterpretation of the orebody, in ore search/exploration.
- Submit accomplishment/update reports to Senior Geologist/Geology Division Manager that indicates the type of work/activity done every day including week-ends and holidays.
- Performs other tasks that may be assigned by the Superior.

Adanacex Resources (Selenga Mining Corporation) - Porphyry Cu-Au Project in Old CDCP Mine
Field Office: Brgy Maglinao, Basay, Negros Oriental

Project Rig Geologist – March 2011 to Sept 2013

Duties and Responsibilities:

- Supervision of the day to day drilling operations/activities in assigned project area;
- Check and observe the proper implementation of the standard drilling operating procedures and the conditions of the drilling equipment/s.
- Responsible for the regular monitoring of all operational drill rig machines.
- Monitor and evaluate the progress of drilling activities against programmed accomplishment relative to the objective and schedule.
- Monitors any problem that may arise during drilling operations.
- Relocate drill holes where drilling is difficult with depths less than 1 meter or location near gully, creek and steep slope.
- Collect and organize drilling data that will be used for the report.
- Assist in the analysis and interpretation of geologic data/information gathered from drilling operation and assay results.
- Assist in the preparation of budget for the Proposed Exploration Drilling Project.
- Performs other tasks that may be assigned by the Superior.

TSGS Mineral Investments Inc. – Iron Ore

Main Office: 2206-07 Field Office: Brgy. Kahayagan, Bayog, Zamboanga Del Sur

Junior Geologist - June 2010 to Feb 2011

Duties and Responsibilities:

- Assisted the Project Manager to deliver the exploration programs at the site.
- Supervision of the actual drilling operations of multiple portable and mechanical rigs.
- Performed geological core logging
- Implements sampling QA-QC protocols from sampling, sample preparations to sample dispatch and ensure these are all within the mine industry standard practices.
- Managed geological data collection, entry, verification and storage.
- Monitored daily the performance of drilling groups in terms of advance meters and recovery of cores.
- Conducted geological mapping and data compilation.

- Prepare and submit weekly accomplishment report for all activities in line with exploration and drilling operations to the Project Manager.

Geo Environmental Consultancy Inc.

Sampaloc, Metro Manila

Assistant Research Analyst - May 2009 to June 2010

Duties and Responsibilities:

- Assisted in the preparation of geological reports for ECC permitting
- Assisted in semi-detailed to detailed mapping
- Assisted in fracture mapping for establishments
- Surface mapping, sampling and data compilation.
- Taking notes of all data / checklist required by the geohazard mapping forms.

Blackstone Asia Integrated Mining Inc. – Iron Ore

Main Office: Unit 202 Summit Tower One, Wack-Wack, Mandaluyong City

Field Office: Alibagu, Ilagan, Isabela

Junior Geologist – April 2007 to April 2009

Duties and Responsibilities:

- Conducted site ocular inspection
- Taking note of general geology, prominent outcrop floats geologic structures, mineralization, local mining activities, etc.
- Supervises in auger activity, random sampling
- Plotting of field information
- Delineating most prospective areas according to geology
- Conducted fieldwork and reconnaissance survey
- Supervised in test pitting and trenching
- Plotting of field information thru Map Info
- Conducted magnetometer survey for iron deposit

STUDENT TRAINEE (On-The-Job-Trainee) Philippine Mining Service Corporation (PMSC) Alcoy, Cebu - April May 2001

A 2-month on-the-job-training which involves exposure to Mine Geo, Plant Operation, Safety and Environment Section, Technical Administration which includes Surveying and Laboratory Services. Part of the training includes sample preparation and other laboratory procedures, and blasting procedures.

TRAININGS AND SEMINARS ATTENDED

- Basic Occupational Safety and Health Course for Safety Officer 2 - Sept 24-25, Oct 1-2, 2023 via Zoom
- PMSEA Conference – Nov 16-17, 2022, Camp John Hay, Baguio City
- ISO 14001:2015 Training – Aug 9-10, 2022, Baguio Gold Operation, Balatoc, Benguet

- Basic Management Training – Sept 1-2, 2022, Speaker: Regina Banta, BNMI Mess Hall, Lipay Sta Cruz
 - Philippine Mining Summit - March 16-17, 2022 via Zoom and Facebook Live
 - Basic Management Training - March 14-18, 2022 - BNMI Mess Hall, Lipay, Sta Cruz, Zambales
 - Virtual Geological Convention 2021 and GEOSEA XVI - 5(+1) Years after the ASEAN Integration: Milestones, Challenges, and Perspectives for Geoscientists - December 6-8, 2021
 - Introduction to Statistics hosted by Philippine Mineral Reporting Code in partnership with Geological Society of the Philippines July 22, 2021 - via Zoom
 - SURPAC Geovia Training on block modeling, resource estimation, etc - in-house training conducted at BNMI Mess Hall - Sept 3-8, 2015
 - ISO 14001 Environmental Awareness Course Training - Benguet Gold Operation, Balatoc, Benguet - Sept 16-18, 2015
-
