Emilio Aguinaldo College Medical Center

February 2022 to July 2022

Medical Technologist – Intern

Manila Medical Center

September 2022 to February 2023

Medical Technologist

Tanza Doctor's Hospital Inc.

October 2023 to Present

- Perform chemical and biological tests on patient specimens for medical diagnosis.
- Obtaining necessary specimens for in-house and reference laboratory testing procedures.

- Provides clear, detailed instructions to patients for self-administered laboratory tests, or personally collects specimens from patients to ensure correct laboratory testing.
- Maintains sufficient laboratory supplies, keeps equipment in working order, and keeps the laboratory workspace neat and organized, all of which improve the efficiency and accuracy of laboratory testing.
- Contributes to the compilation of monthly statistical reports by maintaining complete documentation of all laboratory operations.
- Conducts proficiency testing in accordance with the laboratory's quality assurance.
- protects laboratory files in compliance with governing standards and procedures, subsequently reducing the possibility of losing accreditation from regulatory organizations.
- Contributes to a work environment that empowers information and improvement of abilities to engage with those of other culture.
- Maintains current and competent knowledge through self-directed professional analysis, making connections with colleagues, taking professional development courses, and attending training sessions mandated by the healthcare organizations and industry.
- Contributes to the smooth and effective operation of the healthcare facility by performing all duties and responsibilities as required.
