Phone: +639279689988

Email address: kvgulifardo@gmail.com

Address: 6215 Purok 1 Barangay Jawa,
Valencia, Negros Oriental, Philippines

I have more than three years of experience as a general abdominal ultrasonographer while also working as a radiographer. I have experience working in both hospital and clinic settings, and I have a solid grasp of how to use diagnostic imaging technology. I have a strong commitment to giving patients the best possible care, and I take satisfaction in creating precise images that aid in accurate diagnoses. Additionally, I have expertise working with patients who have special needs, and I like making them feel at ease while having procedures done.

WORK EXPERIENCE

RADIOGRAPHER (2017-2018)

Philippine Tuberculosis Society Inc.
Negros Oriental Chest Dispensary Clinic Dumaguete City

- Diagnostic images and films are created using radiologic equipment. Diagnostic images were processed, tagged, and organized to match with patient records patient records, diagnostic images were processed, tagged, and organized.
- Equipment was used and positioned to capture photographs depending on predefined specifications.
- Was able to achieve the best imaging by determining exposure parameters for specific patients.
- Handled confidential and private data in line with clinic rules and regulations.
- Carefully adhered to quality control standards when developing and labeling diagnostic imaging supplies.
- Film and chemical inventory and supply levels were tracked and maintained.
- Followed radiation safety procedures, and protective equipment in order to keep patients and staff safe.
- After each patient, scanning machines were sanitized to prevent the transmission of infections and illnesses and imaging equipment was checked after each usage to assure proper operation.

RADIOGRAPHER / GENERAL ABDOMINAL ULTRASONOGRAPHER (2019 - Present)

Allied Care Experts(ACE) Dumaguete Doctors Inc.
6200 Dumaguete City, Negros Oriental

- Ultrasound of the abdomen, pelvis, and bladder was performed. Pre-scan hemithorax, breast, and thyroid ultrasounds were performed, and normal and abnormal sonographic findings were noted and given to the radiologist.
- Assisted the radiologist in procedures such as thoracentesis, paracentesis, and biopsies.

- Through discretion and personal support, I welcomed patients and tried to make operations as pleasant as possible.
- Diagnostic images were processed, labeled, and grouped to correspond with patient information. Used and positioned equipment to capture images based on preset settings.
- Assessed physician orders to find medical imaging requirements and used radiologic equipment to acquire, develop, and create diagnostic images.
- As part of the physical exam preparation actions, I collected the patient's medical history.
- Images were captured utilizing mobile equipment in operating rooms, emergency rooms, intensive care units, and patients' bedsides.
- Knowledgeable CT Scan procedures and MRI scan procedures.
- Helped patients get into suitable positions for treatments and instructed them to stay still for the duration of each scan.
- Maintaining a high level of service to patients through various forms of assistance, professionalism, and effectively responding to inquiries and concerns
- Patients were observed for symptoms of adverse reactions or any significant abnormalities.
- Implemented processes to protect patients and staff from radiation exposure during procedures.
- By determining exposure factors for specific patients, we were able to obtain the finest images.
- Advanced techniques were used to produce the best images possible for a thorough diagnosis.
- Worked effectively to give excellent patient care and happiness.

REMOTE INTERNSHIP

Medical Virtual Assistant / Prior Authorization Specialist (January – March 2023)

Better Health Management

- While working from home, performs medical practice tasks such as prescription refills, insurance verification, prior authorization, EMR data entry, patient scheduling, and monitoring telemedicine websites for incoming patient consults.
- Accept prior authorization requests through the electronic health record (EHR), phone, or fax, and ensure that they are appropriately and closely monitored. To complete authorizations and referrals for medical services, review potential patients' medical histories, validate information provided by their referring physicians, and verify their insurance coverage.
- Analyzed medical records and other information to assess authorization request approval.
- Kept customers happy through innovative tactics that were centered on attending to their wants and resolving their issues.
