PERSONAL DATA:

I graduated in **Mapua Institute of Technology** in 2007 with **B.S. in Architecture and Interior Design**. I took a short course of **AutoCAD** and became a **Junior CAD operator** on my first job. From there, I started to have lots of experiences in both engineering design, learned how to read and apply engineering mark ups to Individual Service Drawings to suit them all before doing Combined Service Drawings, clash detections and solutions of all systems of MEPF including Architectural and Structural. Also, I got a glimpse of doing some perspective drawings in architectural and interior. In 2012, I decided to take another short course which is a **Revit Architecture** that can deepen my understandings in 3D visualization, coordination and perspectives. Then, I became a Junior **MEPF-BIM Modeler** in that same year and in 2015, I became a **MEPF-BIM Team Lead**, both local and international. Working in different companies helps me to be flexible to work in a diverse team of modelers, architects, and engineers.
