## NURSING EXPERIENCE

### NURSE II (MAY 13, 2016 - PRESENT)

1. Assessing each patient's condition and its severity based on nursing standard. Performs primary assessment, checking and recording the patient's vital signs, medical history taking, and collecting patient data to be handed off to the physician.
2. Evaluating patient's condition based on severity and emergency situation as Triage Nurse.
3. After assisting the physician in diagnosing the patient and developing a treatment plan, responsible in administering patient medications according to the plan.
4. Responsible in planning and prioritization of incoming patients. Complete all patient documentation and continue to document the ongoing status of each patient.
5. As a Nurse Triage, we catered Pediatrics, Geriatrics, and Obstetric Patients – Cases Handled with Nursing Care to Patient with: Vehicular Accidents, Anaphylactic Shock, Angina Pectoris, Myocardial Infarction, Hypertension, Type 1 and Type 2 Diabetes, Pneumonia, Bronchitis, Asthma, TB patient for Xray and Gen Xpert test, Schizophrenic patients giving Meds for via Oral/IM/IVTT. These patients will be given with nursing care and referred directly to higher facility if the case will not be managed at our end. Giving Meds via Oral, IM and IVTT.
6. Birthing Facility as On Call Nurse: Handled Obstetric Mother with Postpartum Care.
7. Counseled HIV patients and coordinated confidentially and referred to higher facility.
8. Performed suturing to lacerated wound.
9. Performed Psychological First Aid to clients affected to undesirable events especially Super Typhoon Odette.
10. Worked to the best of my ability with an interdisciplinary team to provide optimum care to patients.
