OBJECTIVE

Highly motivated Mechanical Engineering graduate seeking an employer that could provide me Labour Market Impact Assessment (LMIA) so that I can convert my status here in Canada to render skills and expertise for the welfare of the company.

PROFILE

- Bachelor of Science Mechanical Engineering, equivalent to a 4-year undergraduate Canadian degree
- Ten (10) years recent related experience in various manufacturing and plant operations.
- Wide degree of creativity and latitude in manpower handling.
- Good understanding of environmental laws and safety programs and their regulatory requirements.
- Strong diagnostics and logical troubleshooting skills
- Knowledgeable in MS Office (Excel, Word, and PowerPoint), computer hardware and basic software troubleshooting, communication software and social media platforms.
- Proven flexibility, resourcefulness, responsibility, initiative, and works well under pressure and accomplishes satisfactory and on-time results.
- Ability to work independently or as part of a team, sensitive to and respectful of diversity.
- Detail-oriented and a multi-tasker at the same time.
- Very trainable and eager to learn while already equipped with impeccable knowledge of many Engineering concepts.
- Interested in acquiring more community resources knowledge and developing support materials.
- Demonstrated proficiency in written, speaking, and interpersonal communication skills.
