2005-2015

LA UNION, PHILIPPINES  
(0998 460 9943)

- Carpenter
- Finisher
- Shop Manager

## CAREER OBJECTIVE

I was a college undergraduate and currently, the head of a family of four. I took up Bachelor of Science in Industrial Technology majoring in drafting but was not able to finish my studies due to the lack of financial support. I got married at the age of 22, and since then I've been working hard to support my family's needs.

I have ventured into various jobs including working as a construction worker, driver, farmer, vendor, arts and signs maker, and many others. I started working as a furniture carpenter in 2005 until 2015. I then tried my luck by working overseas until 2020 as a factory worker. I came back to the Philippines right before the lockdown during the recent pandemic.

During those times, looking for another job was not easy that's why me and my wife decided to put up a furniture business again, after considering our former customers' requests.

I wanted to work abroad again, with high hopes to be given the chance to. It breaks my heart to see my family suffering from poverty and if I will be able to obtain a residential visa in the future, I'd love for them to be wherever I am.

In addition to the aforementioned reasons, I would also love to expand my knowledge and put my skills and experience to use, while learning more skills at the same time as I want to be a valuable asset to the company I'll be working in.
