

REYNELLE ALPINDO

SOFTWARE ENGINEER

CONTACT

+639054622594
reynelle.l.alpindo@gmail.com
Manila, PH

KEY SKILLS

Angular
Typescript
AWS Lambda
Serverless Framework
Amazon Web Services
DynamoDB
Flutter
HTML
CSS
ASP.NET
Entity Framework
API

EDUCATION

BS Information Technology
Central Luzon State University
2009-2013
Deans Lister

PROFILE

Versatile and results-driven Software Engineer with a strong background in web and app development, coupled with expertise in Amazon Web Services (AWS). Passionate about crafting innovative solutions to complex problems, I bring a wealth of experience in designing, developing, and deploying scalable applications that enhance user experiences. Adept at collaborating with cross-functional teams, I am seeking opportunities to contribute my technical skills and creativity to a dynamic software development environment

WORK EXPERIENCE

Software Engineer

Canapii 2021-Present

- Design, develop, and maintain applications for Web, iOS, and Android platforms.
- Implement responsive and user-friendly interfaces to enhance the overall user experience.
- Utilize appropriate technologies and frameworks for mobile development, such as Angular and Flutter.
- Stay updated on the latest trends and advancements in mobile application development.
- Work closely with UX/UI designers to implement visually appealing and intuitive interfaces.
- Contribute to the development of new features and functionalities based on product requirements.
- Conduct thorough testing to ensure the reliability, security, and performance of mobile applications.
- Identify and resolve bugs, performance bottlenecks, and other issues in the applications.
- Optimize code and improve app performance for a seamless user experience.
- Implement security best practices to protect user data and ensure compliance with relevant regulations.
- Collaborate with security experts to conduct regular security assessments.
- Participate in and conduct code reviews to maintain code quality and adherence to coding standards.
- Provide constructive feedback to team members to improve overall codebase quality.
- Create and maintain technical documentation for mobile applications, APIs, and integrations.
- Ensure that documentation is up-to-date and accessible to other team members.
- Work within an Agile/Scrum development environment, participating in sprint planning, daily stand-ups, and retrospectives.
- Contribute to the continuous improvement of development processes.
- Gather and analyze user feedback to make informed decisions for iterative development.
- Implement improvements based on user feedback to enhance the overall user experience.
- Use version control systems (e.g., Git) and collaboration tools (e.g., Asana) effectively for code management and project tracking.
- Implement tools and strategies for monitoring the performance of applications.

EXPERTISE

- Web Development
- Mobile App Development
- Database Management
- Basic Cloud Computing
- Software Architecture and Design.
- Version Control
- Security Best Practices
- Agile/Scrum Methodologies
- Problem Solving and Debugging
- Collaboration and Communication
- Continuous Learning
- Time management, teamwork, and adaptability to evolving project requirements.
- Strong analytical and critical thinking skills.

Software Engineer

Infor PSSC

2018-2021

- Implement responsive and interactive designs for optimal user experience..
- Ensure cross-browser compatibility and responsiveness of web applications.
- Debug and fix issues related to browser inconsistencies.
- Collaborate with UX/UI designers to implement design elements and enhance overall user experience.
- Optimize application performance for smooth user interaction.
- Conduct unit testing and debugging of JavaScript code.
- Collaborate with Quality Assurance (QA) teams to identify and fix defects.
- Design, implement, and maintain databases (e.g., MySQL, MongoDB, PostgreSQL) for web applications.
- Optimize database queries and ensure data integrity.
- Implement authentication and authorization mechanisms.
- Ensure secure and efficient data exchange between different systems.
- Implement security best practices to protect web applications from common vulnerabilities.
- Conduct security audits and collaborate with cybersecurity experts if necessary
- Participate in Agile/Scrum methodologies, attend sprint planning, and contribute to sprint reviews.
- Create and maintain technical documentation for code, APIs, and system architecture.
- Ensure that documentation is accessible and up-to-date for team members.
- Optimize application performance on both the frontend and backend.
- Conduct load testing and implement improvements for scalability.

Associate Software Engineer

Accenture Inc

2014-2018

- Works with senior developers and team leads to manage large and complex projects for clients
- Specializes in Financial and Sales Audit web applications
- Uses Agile methodology for rapid project development
- Joins in client meetings to learn about the development of project scopes
- Communicates with the product owner to obtain more information and discuss design options
- Makes creative corporate web design and UI
- Serves as a Configuration Manager during deployments and is knowledgeable with Octopus Deploy
- Provides production support and handles service request and incident issues from client
