Re: Application for Welder Position

Dear Hiring Manager:

I'm writing to express my interest in interviewing for the position of Welder. I am confident the skills and abilities I've honed during 8 years of experience as a Welder can be an asset to your organization.

During my professional experience in Troycor Lightings Fixtures, I specialized in arc welding and became proficient in the corresponding welding tools. I customized and fabricated various fixtures using tubing materials and parts via print or jig application and structures involving a variety of parts and assemblies on all product lines. I also monitor fabrication process production via military time of assembling, I think the combination of my education and experience makes me a great fit for your Company.
