Summary:

Dedicated employee with multiple years of experience. Proven skills and talent in achieving business goals and objectives. Extensively trained in safe manufacturing practices. Here not only to better one self, but also further the growth of the employer.

Objective:

To show my skills and knowledge in operating CNC wire electric discharge machine (wire cut), CNC milling machine and conventional machines like Vertical grinding, Milling, and Lathe Machine. To gain more knowledge to help the company to achieving its vision and mission.

Previous work experience:

- **CANPACK CZECH SRO**
Machine operator
Forstova 1596 349 01 Stribro Czech Republic
April 2021 to present
- **PEGA HOIST COMPANY**
CNC Operator(lathe and automatic drilling machine operator)
Fablovka 547 533 52 Pardubice Czech Republic
August 2019 to January 2020
- **FILLMATECH COMPANY**
CNC Operator(lathe machine)
Osek 274 267 62 Komarov U Horovic Czech Republic
August 2018 to May 2019
- **FONSTAR INTERNATIONAL TEACHNOLOGY**
CNC Operator
Yongkang District, Tainan city, Taiwan
August 2011 to 2018
- **NSB ENGINEERING DESIGN AND FABRICATION**
Operator and Programmer of Electric Wire Discharge machine
(Mitsubishi model, fanuc and schmer model
June 2010 to 2011
- **YAMASHITA MOLD PHILS.**
Operator of wire electric discharge machine
September 2003 to 2009

Skills:

- Can set up and operate CNC wire electric discharge machine and CNC milling machine such as:
 - Sodick model: AQ350L, AQ550L, MARK A350, AP200
 - Fanuc model: Fanuc OiC, OiD, and Fanuc OiCE Mitsubishi model AF10S, Charmill model, Siemens and Schmer model.
- Knowledge in programming such as Fanuc fapc cut for fanuc machine, Media pat for Mitsubishi model and Master Cam for Schmer model.
- Can operate Electrode boring machine or Super drill such as K1C
- Can operate Automatic Grinding machine, Vertical and horizontal CNC machine and Conventional Milling machine and Lathe Machine.
- Know how to use measuring instrument such as Microscope, micrometer, height gauge and vernier caliper.
- Can produce product with precise dimension.

Job Responsibility:

- Plan, analyze and check the set up drawing to the blue print.
- Clean the machine table for preparing for the set up of the given work piece.
- Operate and adjust controls in CNC machine in accordance of production drawings.
- Assure quality and measurement of the product depends on the given dimension of the drawing.
- Check all the parameters of the machine for good running condition.
- Check the finish products for good quality.
- Always follow the standard operating procedure of the company.
- Maintaining the cleanliness of the machine, workplace and perform housekeeping if necessary.
