## HIGHLIGHTS OF QUALIFICATIONS

With over 13 years of experience spanning various engineering roles, including positions as Maintenance Engineer, Engineering & Maintenance Manager, and Project Manager, I bring a wealth of expertise to the table. My tenure in these roles has equipped me with a deep understanding of maintenance practices, project management principles, and HVAC-R systems. This extensive experience, combined with certifications as an Accredited Pollution Control Officer and Certified Safety Officer, positions me as a seasoned professional capable of delivering effective solutions and driving success in engineering endeavors.

## EDUCATION

2019

**32 Units in Master of Engineering (Mechanical Engineering)**

University of Mindanao, Davao City, Philippines

2011

**Bachelor of Science in Mechanical Engineering**

**University of Mindanao**

Bolton St, Poblacion District, Davao City, 8000 Davao del Sur, Philippines

## WORK EXPERIENCES

November 2021- March

2024

**Project Engineer & Consultant**

**Sagrex Foods Incorporated**

- Undertake the role of Project Engineer & Consultant at Sagrex Foods Incorporated, specializing in the installation and design of machinery for frozen banana and other tropical fruits product lines.
- Offer expert consultation and technical guidance on the selection, installation, and optimization of machinery and equipment tailored specifically to the production of frozen banana and tropical fruit products.
- Collaborate closely with engineering teams and external vendors to design custom machinery solutions that meet the unique requirements of processing tropical fruits, ensuring efficiency, reliability, and product quality.
- Manage the implementation of machinery installation projects from conception to completion, overseeing timelines, budgets, and resource allocation to ensure successful execution.
- Conduct comprehensive feasibility studies and technical assessments to evaluate the viability and effectiveness of proposed machinery designs and installation plans.

February 2016- June

2021

**Engineering and Maintenance Manager**

**Sagrex Foods Incorporated & First Panabo Tropical Fruits Corporation**

- Oversee engineering and maintenance operations to ensure efficient facility functionality and equipment reliability.
- Develop and implement maintenance strategies, schedules, and procedures to optimize equipment performance and minimize downtime.
- Manage maintenance staff, contractors, and budgets to achieve departmental objectives and cost-effectiveness.
- Coordinate with other departments to prioritize maintenance activities and support production goals.
- Ensure compliance with safety regulations and standards, implementing best practices to maintain a safe working environment.

November 2014-

February 2016

**Engineering Supervisor**

**Insular Oil Corporation**

- Oversee project engineering activities focused on the construction of oil depot tanks at Insular Oil Corporation, ensuring adherence to industry standards and safety regulations.
- Lead a team of project engineers and construction personnel, providing guidance and supervision throughout the tank construction process, from design to commissioning.

- Collaborate with design and engineering teams to develop tank construction plans, specifications, and schedules, ensuring alignment with project objectives and regulatory requirements.
- Coordinate with contractors, vendors, and regulatory agencies to ensure compliance with environmental, safety, and quality standards throughout the construction process.

October 2011-  
November 2014

**Engineering and Maintenance Supervisor  
Zummit Foods Corporation**

- Spearheaded engineering and maintenance operations at Zummit Foods Corporation, focusing on the upkeep of patty and bread machines integral to food production, as well as refrigeration and air conditioning systems critical for food preservation.
- Supervise a specialized team tasked with the maintenance and servicing of patty and bread machines, ensuring their seamless operation to meet production demands.
- Coordinate maintenance schedules for both machinery and refrigeration and air conditioning systems, optimizing production workflows while ensuring food safety and quality standards are upheld.
- Collaborate closely with production managers and refrigeration technicians to synchronize maintenance activities, minimizing disruptions and downtime in food production processes.
- Ensure compliance with sanitation regulations and industry standards in both machinery and environmental control systems, safeguarding the integrity of food products throughout the production cycle.

---

## CERTIFICATION

October 2020	Managerial Seminar and Training
March 2017	Internal Audit
November 2016	Industrial Calibration Plumbing Design
October 2016	Establishing Documents and Records Control Seminar
September 2016	Good Manufacturing Practices (GMP) 5'S ( Sort, Straighten, Shine, Standardize and Sustain) Management
August 2016	Instrumentation and Control Sewage Treatment Plant HVAC (Heating Ventilating and Airconditioning) Load Calculation Efficient in Maintenance Reliability Energy Management
June 2016	PCO (Pollution Control Officer) Series 2 24 hours
April 2016	PCO (Pollution Control Officer) Series 1 24 hours
September 2014	BOSH ( Basic Occupational Safety and Health Training ) 40 hours Supervisory Training
April 2013	HACCP (Hazard and Critical Control Point )
