WORK EXPERIENCE

SONOGRAPHER

Oct 3, 2023- Present

RAMOS-PARRA MEDICAL & DIAGNOSTIC CENTER

A sonographer is a healthcare professional who specializes in the use of ultrasonic imaging devices to produce diagnostic images, scans videos or three-dimensional volumes of anatomy and diagnostic data.

- **General Ultrasound**

An abdominal ultrasound is a noninvasive procedure used to assess the organs and structures within the abdomen. This includes the liver, gallbladder, pancreas, bile ducts, spleen, and abdominal aorta. Ultrasound technology allows quick visualization of the abdominal organs and structures from outside the body.

- **Obstetrician Ultrasound / Gynecology Ultrasound**

Obstetrical ultrasound provides pictures of an embryo or fetus within a woman's uterus, as well as the mother's uterus and ovaries. A Doppler ultrasound study may be part of an obstetrical ultrasound examination. Doppler ultrasound is a special ultrasound technique that evaluates movement of materials in the body.
