ABOUT ME

Passionate Front-End Developer and UI/UX Designer with a strong focus on creating visually captivating and user-friendly digital experiences. Based in the Philippines, I combine my technical expertise in HTML, CSS, and JavaScript with a keen eye for design to craft seamless interfaces.

TOOLS

- HTML / CSS
- Javascript
- Python
- Figma
- SQL
- Git

PROJECTS/FREELANCE WORK:

- **INTERACTIVE PRODUCT LANDING PAGE**
  - The Interactive Product Landing Page project aimed to create a visually engaging and user-friendly landing page to promote a specific product.
- **GAMING WEBSITE**
  - The Responsive Gaming Website project focused on creating an immersive online platform centered around the popular game "Valorant."
- **CAR WEBSITE**
  - Designed an engaging car-themed website showcasing diverse vehicles and enhancing user experience through intuitive design and captivating visuals.
- **TRAVEL WEBSITE**
  - Crafted a dynamic travel website, offering a rich exploration of destinations, leveraging intuitive design to captivate users and provide an immersive travel experience.
- **NFTS UI DESIGN**
  - Created visually stunning UI designs for an NFT platform, focusing on an intuitive user interface to enhance the digital art viewing and trading experience.
- **FURNITURE MOBILE APP DESIGN**
  - Designed a mobile app for furniture, prioritizing seamless UI/UX to provide users with an enjoyable shopping experience for home furnishings.
- **PORTFOLIO WEBSITE**
  - Designed and developed a personal portfolio website showcasing a diverse range of projects and skills. The portfolio website serves as a comprehensive display of my capabilities and creativity in web development and design.
