ABOUT ME

Passionate Front-End Developer and UI/UX Designer with a strong focus on creating visually captivating and user-friendly digital experiences. Based in the Philippines, I combine my technical expertise in HTML, CSS, and JavaScript with a keen eye for design to craft seamless interfaces.

TOOLS

- HTML / CSS
- Python
- SQL
- Wordpress
- Javascript
- Figma
- Git
- Elementor

PROJECTS/FREELANCE WORK:

- **INTERACTIVE PRODUCT LANDING PAGE**
 - The Interactive Product Landing Page project aimed to create a visually engaging and user-friendly landing page to promote a specific product.
- **GAMING WEBSITE**
 - The Responsive Gaming Website project focused on creating an immersive online platform centered around the popular game "Valorant."
- **CAR WEBSITE**
 - Designed an engaging car-themed website showcasing diverse vehicles and enhancing user experience through intuitive design and captivating visuals.
- **FURNITURE MOBILE APP DESIGN**
 - Designed a mobile app for furniture, prioritizing seamless UI/UX to provide users with an enjoyable shopping experience for home furnishings.
- **PORTFOLIO WEBSITE**
 - Designed and developed a personal portfolio website showcasing a diverse range of projects and skills. The portfolio website serves as a comprehensive display of my capabilities and creativity in web development and design.

WORK EXPERIENCE:

- **CUSTOMER SUPPORT ENGINEER (UI/UX) 2024**
 - As a Customer Support Engineer at Elementor, I provide technical assistance to website users, troubleshoot issues, and ensure a smooth user experience. I collaborate with the development team to address bugs and enhance features. My role focuses on maximizing user success and satisfaction through effective and empathetic support.
